INTERNSHIP

Web development and Digital Marketing Intern

- **SN INFO SYSTEMS, BANGALORE** *October 2024 - May 2025*

  Designed and Implemented a customized Webpage about top engineering colleges across India. It helps students explore institutions, compare options, and make informed decisions for their engineering education.
- Languages and libraries used : Java Script,CSS, React.js,
- https://www.bestengineeringcollegesinindia.com/
- Worked as a digital marketing intern for *GetMyCollege.com*, promoting the platform through SEO, social media, and targeted campaigns. Helped increase web traffic and student engagement by optimizing content and outreach strategies.

EXPERIENCE

Sahara Group of Industries

- Designed and developed scalable frontend components using modern JavaScript, while building backend APIs to support dynamic content and business logic.
- Developed and integrated RESTful APIs, managed server-side routing, and handled database operations for efficient data storage and retrieval.
- Optimized website performance through code refactoring, efficient API handling, asset compression, and improved load times.
- Enhanced on-page SEO and technical performance by improving semantic HTML structure, optimizing metadata, and refining overall application architecture.
- Ranked for 800+ keywords on search engines, improving organic visibility and driving consistent traffic growth.
- Optimized content to appear in AI-driven search platforms like ChatGPT and modern search experiences

PPROJECTS

- ***Smart Wearable for Visually Impaired People(VIP), using IOT***
  The main objective of our project work is to provide a reliable,cost effective, low power solution for a blind people which would help them to move almost like any other normal pedestrian.
- **3D Scanning machine**
  "Developed a 3D scanning machine using Arduino Nano, stepper motor, and Sharp IR sensor for precise object digitization."

- **Fingerprint-Based Voting Machine**
  Designed a secure and efficient voting system using biometric authentication. The fingerprint-based mechanism ensures that each voter can vote only once, thereby eliminating the possibility of duplicate or fraudulent votes.

EXTRA SKILLS

- Team leading, Photography, Videography, Video Editing, Graphic Designing,

EXTRACURRICULAR ACTIVITIES

- Core member of a Cutting Egde IOT Research And Exploration Association,Core Member of Robothon 2K24,Took part in 24h Gameathon and Hackathon at college level
